Data Notes

Agricultural Overview

This bulletin covers 27 agricultural industries in the State of California. The number of industries ranges from five to seventeen within each of the six geographic regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details).

The data are organized into the following tables by state and region:

- Wage and Salary Workers
- Average Hourly Earnings

Summary

Employment

California agricultural employment for April 2001 increased 53,900 jobs over the previous month for a gain of 16 percent. Total Agricultural Production increased 24,300 from March 2001 to April 2001, a gain of 12 percent. Agricultural Services increased by 29,600 jobs, a gain of 22 percent. Seasonal increases in both Agricultural Production and Agricultural Services are normal for the month of April. The change in California agricultural employment from March 2000 to April 2000 was an increase of 78,300 jobs.

The largest increases among Production Crops were registered in Grapes with a gain of 9,400 and General Farm Crops, which increased by 9,000. Farm Labor Contractor Services registered the largest gain overall with an increase of 30,100 jobs. The largest decrease for the month was registered in the Other Field Crops category with a loss of 7,500. Total agricultural employment increased 25 percent in the San Joaquin Valley Region, 24 percent in the Sacramento Valley Region, 19 percent in the Central Coast Region, and 11 percent in the South Coast Region. In the North Coast Region, agricultural employment decreased by 25 percent. The Desert Region remained virtually unchanged.

Production and Crop Activity

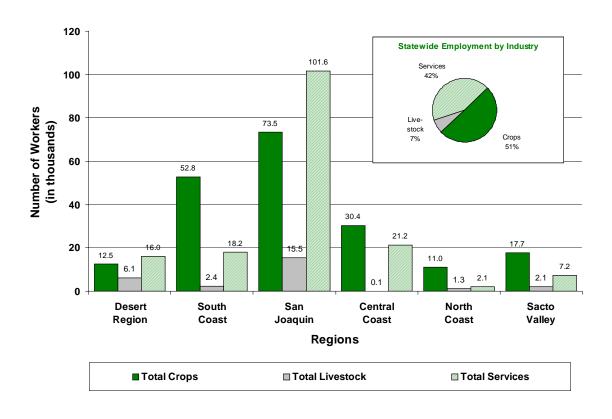

Cool, wet weather conditions slowed or delayed the planting of cotton in most areas. Some early-planted fields, damaged by rainstorms, were replanted during the latter part of the month. Growers continued cultivating and applying herbicides as field conditions permitted. Cutting, windrowing, and baling of alfalfa hay continued where possible. Alfalfa seed fields were cultivated and some were burned back with acid treatments. Oat hay was also cut and baled in some areas. Bean and cornfield pre-irrigation and bed formation activities were underway in preparation for planting. Tomatoes were weeded and sprayed for flea beetles. Melons, sweet corn, and tomatoes continued to be planted as field conditions permitted. Watermelon and honeydew planting was underway in the San Joaquin Valley. The planting of peppers, eggplant, squash, and cucumbers also continued. Some fields were weeded, cultivated, and fertilized. The harvesting of lettuce, broccoli, and asparagus was in full swing. Other vegetables harvested during the month included: cabbage, carrots, cauliflower, cilantro, collard greens, daikon, eggplant, kale, mustard greens, green onions, parsley, radicchio, radishes, snap peas, spinach, and turnips.

Fruit growers continued fertilizing, cultivating, and applying fungicides and herbicides. Orchards were irrigated late in the month. Stone fruit orchards were thinned. Grapefruit picking was active in the desert areas. The harvest of navel and Valencia oranges continued. The lemon harvest was also active. Strawberries were harvested in San Diego and Ventura counties. Almond trees were treated for fungal problems and some walnut trees were treated for blight.

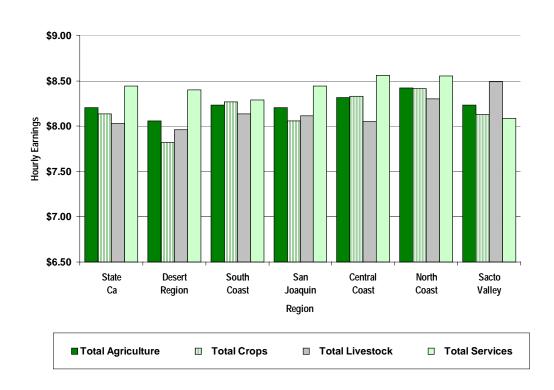

Some ranchers, in preparation for drying vegetation, began cutting firebreaks along public right of ways. Some feeder cattle and spring lambs were moved to market in central California. Bee activity was active. Hives were removed from prune orchards and some hives were placed in citrus orchards and squash fields.

DATA NOTES

Data Sources:

These data are obtained from two sources: the Employment Development Department (EDD) Covered Employment and Wages (ES-202) data files and a monthly survey conducted by the California Agricultural Statistical Service (CASS) of the U.S. Department of Agriculture (USDA) and the Labor Market Information Division of EDD of 4,200 agricultural employers. The sample was selected to be representative of the state's agricultural employers by size, geographic location, and industry categories. Sample data are gathered for the survey week that includes the 12th calendar day of the month. All data in this bulletin represent activities taking place during this mid-month period. Same month prior year employment data are benchmarked to the ES-202 data files maintained by EDD.

Data Comments:

To aid in accurate usage and interpretation of the data, please note the following:

- Agricultural Services employment survey data may be recalculated; historical trend information is used to adjust sample data when low response rates occur.
- Regional data may show greater variability than statewide data because of small sample size and variable reporting patterns in specific industries.
- Current month regional estimates are based on the recorded addresses of owner-operators. Same month prior year regional data are based on worksite locations. Significant differences between regional current month and same month prior year data could result, although statewide totals might be comparable.
- Where data cannot be estimated because of inadequate sample reporting, the letters "na" have been entered into the
 field to indicate estimates are not available.
- Wage data include wages of supervisors and hired non-production workers (primarily administrative personnel). Piece rate data are also included where applicable.
- Fishing, forestry, and hunting industry data are not included in the Agricultural Services estimates. Unique seasonal industry patterns of employment make producing employment estimates for these industries problematic.
- Employment data do not include employers of unpaid family workers.
- Agricultural workers who are employed by farm labor contractors are reported in Agricultural Services under that
 industry category. Employment levels in Crop Production and Livestock Production do not reflect their activities in the
 associated industries that contract with the farm labor contractors.

Total agricultural employment and hourly earnings estimates in this bulletin are derived from the monthly Current Employment Statistics for Agriculture project. Estimates in this bulletin will differ from other agricultural estimates published by EDD and the USDA because of differences in the number of industries covered and in the definition of agricultural workers.

Subscriptions:

Annual subscriptions are available for \$30.00 per year. Ask for publication number LAU-15. To subscribe or for information, please call (916) 262-2162 or write to:

Employment Development Department Labor Market Information Division Publications Information Unit 7000 Franklin Blvd., Building 1100 Sacramento, CA 95823
